### FROM THE DESK OF HON. SECRETARY, H.E.S.

*Dr. Asmita Parikh*

The Covid-19 pandemic affected countries all over the world and brought them to a state of lockdown. Efforts were made by various medical faculties to combat the deadly virus. In the month of February 2020, our respected Chairman, **Dr. Mohanbhai Patel** read an advisory by the Central Council of Research that was printed in a national newspaper which stated that Arsenicum Album 30 was to be used for immunity stimulation and care against Corona virus. He immediately directed the college to distribute the homeopathic medicine absolutely free of charge in our hospital. This generous initiative encouraged our homeopathic faculty to continue distributing the homeopathic medicine free of cost in their individual capacities to various societies and police stations around the vicinity of the college. This noble act of **Dr. Mohanbhai Patel** has proved to be a huge aid for the cause of the society.

Furthermore, at our Mumbadevi Homeopathic Hospital we have been undertaking a series of measures for the health & welfare of our patients by appropriately following a protocol and using our existing resources judiciously. A carefully prepared schedule is meticulously followed by our doctors wherein they attend the O.P.D. on rotational basis. Patients entering our hospital premises have to compulsorily wear a mask and maintain social distancing at all times. Every patient's temperature is checked by contactless thermometer and screened for symptoms suggesting of Covid-19.

The purpose of this is to recognize and sort out patients with COVID - 19 at first point of entry in our hospital. Our staff took great efforts in spreading awareness and imparting knowledge to patients regarding the imperative preventive steps to be taken against Covid-19.

Similarly, it is mandatory for all our health workers (medical / non-medical) to wear a mask and gloves at all times. All our doctors have to strictly follow Hand Hygiene which includes hand washing with soap & water and / or use of alcohol-based sanitizers. Our hospital takes the responsibility to ensure the availability of hand rub products at all times in the O.P.Ds & I.P.Ds. Care is taken to ensure that all rooms, tables, chairs & instruments like Stethoscope, B.P. apparatus etc. are cleaned and disinfected using 1% sodium hypochlorite or alcohol based disinfectants which is sprayed at every corner of the premises at least once daily.

Each O.P.D. also has interns to assist the doctors. Care has been taken to ensure social distancing amongst the medical staff as well as amongst the patients. Interns are also active with daily on-line Internship sessions where in interns are subjected to experiential and participative learning.

The pandemic also affected educational systems worldwide, leading to almost a total closure of schools, universities and colleges. In response to our government's appeal to continue imparting education via on-line lectures, we at Smt. Chandaben Mohanbhai Patel Homeopathic Medical College left no stone unturned in doing the needful. Our college took up the matter seriously and drafted a detailed plan to effectively impart medical education using online platforms. All full time teachers have been conducting online lectures regularly as per the regular Time Table of the college.
